PUT A BRAIN
IN YOUR WORKFLOW

opsstream™
AUTOMATED PROCESS IMPROVEMENT

CUSTOM MANAGED WORKFLOW

opsstream™ MC provides a single location for the distribution and management of saw configuration, prioritization and workflow.
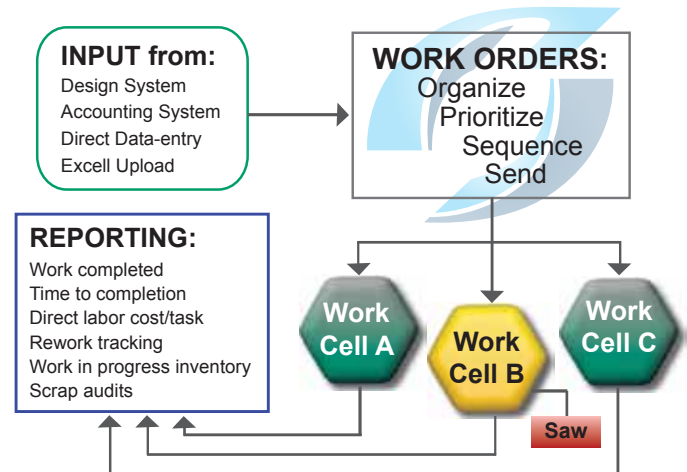

opsstream™ MC manages your "to do" list of orders and specific work activities for workers and workstations. Simple to use and modify, our platform gives you control to:

> Import work orders
> Establish priorities
> Coordinate work activities across work cells
> Dynamically alter priorities to accommodate re-work or rush orders

opsstream™ MC coordinates changes in work priorities across all work sites to optimally meet changing customer needs and priorities while reducing waste.

opsstream™ *MC* **Order Management**

INPUT from:
Design System
Accounting System
Direct Data-entry
Excell Upload

WORK ORDERS:
Organize
Prioritize
Sequence
Send

REPORTING:
Work completed
Time to completion
Direct labor cost/task
Rework tracking
Work in progress inventory
Scrap audits

Work Cell A
Work Cell B
Work Cell C
Saw

Additional Benefits to Your Operation:

> Reduces production time for rush / special orders
> Reduces errors from manual data entry
> Synchronizes workflow across multiple work cells and devices
> Reports detailed time/activity and time/worker (direct labor costs per activity)
> Adapts to changing business needs
> Highly Expandable
> Integrates with accounting systems
